Nazdar OEM Replacement Inks for Grand Format Inkjet Printers : Nazdar Ink Technologies manufactures the widest range of UV curable and solvent OEM replacement inks for the most popular grand format inkjet printers. Please refer to the Nazdar Digital Inks Compatibility Guide, contact SourceOne Customer Service, or visit www.SourceOne.Nazdar.com for more information on the right ink solution for your printer.

NAZDAR DIGITAL INKJET INKS

FEATURES AND BENEFITS:

- OEM color comparable
- Consistent color density values
- Long term exterior performance with proven resistance to the effects of UV degradation and color fading
- High intensity, high gloss colors
- Reliable unattended printing
- Substantial savings over OEM ink
- Backed by the industry's strongest third-party warranty

130 Series Digital Inkjet Inks

Nazdar 130 Series Digital Imaging ink is designed specifically for use in Mimaki™ CJV, JV33, JV300 and JV150 digital printers. Users of Mimaki SS21 ink cartridges on these printers can now change to Nazdar 130 Series ink without the need to flush with the Nazdar plug-n-play ink capabilities.

NAZDAR UV CURING INKS

FEATURES AND BENEFITS:

- Adhesion on a wide variety of flexible and rigid substrates
- Excellent resistance to edge chipping on rigid substrates when used with a knife or router cutter
- High impact, high intensity colors with extended color gamut
- Long term exterior performance with proven resistance to the effects of UV degradation and color fade
- Consistent color density values
- Heat bendable

260 Series Digital UV Inkjet Ink

Designed to be run in DX-4 and DX-5 printhead, LED curing printers at normal conditioned room temperatures. The inks exhibit excellent adhesion and flexibility on a variety of typical Point of Purchase (POP) substrates.

Item No.	Colors	220 ml Cartridge
LED260CYC2	Cyan	\$72.00
LED260MAC2	Magenta	\$72.00
LED260YEC2	Yellow	\$72.00
LED260KCC2	Black	\$72.00
LED260WHC2	White	\$72.00

702 Series Digital UV Inkjet Ink

The 702 series inks are Nazdar's latest entry into the Plug-and-Play inkjet market. Designed for use in the Océ Arizona printers using IJC256 inks, these new inks offer exceptional compatibility, quality and cost effectiveness, combined with a seamless conversion process.

Closely color matched and chemically compatible with the IJC256, users can save both time and money by switching one color at a time. Flushing, purging or re-profiling is not necessary when transitioning to Nazdar 702 series.

Item No.	Colors	2 Liter Bag
LWU702CY2B	Cyan	\$235.00
LWU702MA2B	Magenta	\$235.00
LWU702YE2B	Yellow	\$235.00

NAZDAR UV CURING INKS

703 Series Digital UV Inkjet Ink

Nazdar's 703 series inks are the most recent entry into the Plug-and-Play inkjet market. Designed for use in the Fujifilm Acuity printers using the KI Series inks, these new inks offer exceptional compatibility, quality and cost effectiveness, combined with a seamless conversion process.

Closely color matched and chemically compatible with the KI Series ink set, users can save both time and money by switching one color at a time. Flushing, purging or re-profiling is not necessary when transitioning to Nazdar 703 series.

Item No.	Colors	2 Liter Bag
LWU703CY2B	Cyan	\$235.00
LWU703MA2B	Magenta	\$235.00
LWU703YE2B	Yellow	\$235.00
LWU703KK2B	Black	\$235.00
LWU703WH2B	White	\$154.50
LWU702FF2B	Flush Solution	\$50.00

705 Series Digital UV Inkjet Ink

Nazdar 705 Series inks have been designed as a direct replacement of the HP® 250 Series inks in use in the FB500/700 printer platform. The 705 Series inks are compatible with the OEM product and can be replaced one color at a time as the OEM inks run out. The 705 Series has a comparable substrate range to the OEM inks.

Closely color matched and chemically compatible with the HP 250 ink, users can save both time and money by switching one color at a time. Nazdar 705 Series inks can be used in conjunction with any additional HP 250 Series colors or clears. Flushing, purging, or re-profiling is not necessary when transitioning to Nazdar 705 series inks.

Item No.	Colors	3 Liter Box
LWU705CY3P	Cyan	\$295.00
LWU705MA3P	Magenta	\$295.00
LWU705YE3P	Yellow	\$295.00

ROLAND ECO-UV INKS

Specifically formulated for the VersaUV's curing system, ECO-UV Ink is perfect for curing at all available print speeds, delivering high color density and wide gamut for exceptional images print after print. ECO-UV adheres to a wide range of coated and uncoated media, including foils, paper, clear films and vinyl for increased versatility.

Eco UV Inks for LED, LEF and LEJ Series

With ECO-UV inks, the absence of ink reaction and absorption means colors will be consistent across different media types without requiring profiles specific for the media.
