

What our customers think about Nazdar Digital Ink...

"We were a little nervous about switching to alternative inks, but ... **we've had no problems and the print-heads are clear even after a day or two of not being used.**" – J.C.

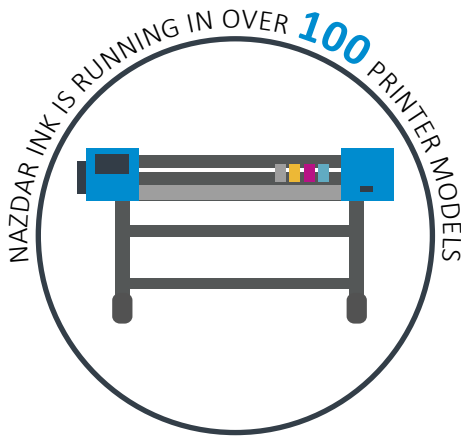

"**Conversion was very simple and the inks are very consistent.** The health and safety signs that make up the bulk of our work require block colors and **Nazdar 702 inks provide vibrancy and a nice matte finish with none of the striping we experienced with our other inks.** **We're very pleased with them.**" – A.M.

"Initially I wouldn't risk anything other than OEM inks ... because of the cost of the printer. But ... **I tried Nazdar and found no difference at all – and I'm saving money.**" – T.F.

"I've been using Nazdar inks for my skateboard graphics for years, and **they have never let me down. Always a perfect, thin and glossy print, plus extremely easy clean-up.**" – R.M.

"We switched one machine over to Nazdar and it was stable, and stayed stable. **It's been solidly reliable ever since – batch-to-batch performance is never, ever a problem.** We now run Nazdar inks on [multiple] printers, producing identical colors on them all." – N.B.

"We're saving around 30% on the cost of an ink cartridge. So on a full set of 6 **we are making significant savings without having to make any compromise on print quality.**" – L.C.
