FRONT-LIT BANNER

Ultraflex Normandy Pro FL

Normandy® Pro FL is a premium 13 oz banner or billboard material. It is compatible with latex, solvent and UV inks. The Normandy brand is recommended by printer manufacturers and preferred by high end, wide format printing facilities. This product has a 1000 x 1000 high tenacity yarn construction that makes it one of the strongest 13 oz billboard substrates on the market. It has a unique face film which produces vibrant and consistent prints. Normandy Pro comes in both matte and gloss finishes. In 80" widths and below, this product is called JetFlex FL.

BLOCKOUT BANNER

APPLICATIONS:

- Single and double-sided media with a light blocking layer to prevent image show-through
- Multiple products available for range of applications
- Indoor and outdoor
- Temporary to longer term uses
- From backdrops to boulevard banners to roll-up banner displays

Ultraflex DSS 12 oz Blockout

DSS 12 oz Blockout is a 12 oz smooth, two-sided blockout banner material that delivers similar quality printing results on both sides. DSS 12 oz Blockout is compatible for use with solvent, eco-solvent, UV, latex and screen printing. It is best suited for indoor applications where complete opacity is required. With its unique, low-curl formula and lay-flat appearance, DSS 12 oz Blockout is ideal for pop-up or scrolling banner stands, trade show and events graphics, POP, and any hanging banner or sign.

MESH BANNER

APPLICATIONS:

- Flexible banner materials that allow for light and air-flow while maintaining image impact
- Versions available for either standard printers or those with special mesh kit option
- Indoor and outdoor temporary and long term uses
- From point-of-purchase to construction and scaffolding to building wraps and concert events

Ultraflex Strip Mesh Plus

Strip Mesh Plus is an 8 oz coated, polyester scrim, mesh banner material with a PVC backing. The backer creates an air-tight print surface to prevent ink spray through while helping to feed the material through the printer. The backer is easily removed after printing. The material allows 37% air-flow through and is ideal for banners, protective barriers and fence wraps. Strip Mesh Plus is compatible with solvent, eco-solvent and UV inks.

Ultraflex Strip Mesh Pro LTX

Strip Mesh Pro LTX is a 9 oz mesh with backer that may be easily removed after printing. The specially designed backer creates an air-tight print surface preventing ink spray through and allows vacuum equipped printers to hold material flat during printing. The backer is formulated to work with solvent, eco-solvent, UV, latex and screen printing. Strip Mesh Pro LTX allows 25% air-flow through and is ideal for outdoor banners, building wraps, fence mesh graphics and boulevard banners in high wind areas.

PRESSURE SENSITIVE: HIGH PERFORMANCE

APPLICATIONS:

- Designed for the most demanding applications
- Highly conformable for vehicle and fleet graphics
- Available in standard or air egress adhesive for bubble-free installation
- For full and partial vehicle wraps to long term signage

Arlon DPF 6100XLP

DPF 6100XLP is a gloss white cast film with bubble releasing, tinted, clean removing, repositionable, permanent pressure-sensitive adhesive. The LX (Low Profile) X-Scape Technology allows installers to have a speedy installation and ensure a smooth paint-like finish. Designed for large format graphics, DPF 6100XLP is made of premium quality cast facestock with a low profile liner. The adhesive system is designed to provide excellent opacity as well as easy installation. The film provides superior conformability around rivets, curves, contours and channels. DPF 6100XLP is rated for outdoor durability up to 7 years (unprinted).

Mactac IMAGin PrintVinyl

IMAGin PrintVinyl is a rare find for printers that are looking for a 4-year durable print media at an economy price that does not sacrifice in quality. IMAGin PrintVinyl prints exceptionally well and the clear adhesive is strong; meaning that it will not only stick to high surface energy substrates like stainless steel and aluminum, but also Sintra®, Gator® boards and other low-surface energy substrates like powder-coated paint. You will be hard pressed to find a better branded option with 4-year durability.

- From low energy plastic to sidewalk graphics

Mactac Rebel H Multi-PRINT

REBEL is different by design. The opacity is built into the face stock so you have no grey adhesive to dull the film's white point. You get the opacity you need, without diluting the strength of the adhesive with grey filler. The adhesive is clear, strong and proven to have more tack and peel than the competition. Wrap it up with Mactac's unique SuperFlat liner for a true multi-print media, and you have the one product that customers ask for when it absolutely has to stick. Designed for wide format and screen printing. Clear film version also available.

LAMINATE & MOUNTING FILM

Mactac PERMACOLOR RAYZor PG3600 Laminate

The Permacolor system is a series of pressure sensitive products for mounting and protecting in the imaging industries. Pressure sensitive Permacolor provides fast, efficient processing through cold roll lamination techniques without the need for heat, drying or messy coating operations. RAYZor is a 1.5 mil clear, highly conformable cast PVC film. The product is coated on one side with a clear permanent, acrylic pressure sensitive adhesive and supplied with a 1.2 mil polyester release liner. These are designed for use in long-term outdoor, marine, fleet or vehicle markings on flat, curved, corrugated and riveted surfaces. Additional UV protection is built into the overlaminating film to help extend the life of your graphic by resisting color fade caused by ultraviolet light.

Mactac ColorGard LUV Laminate

Customers prefer ColorGard LUV as their quality intermediate overlaminates. ColorGard's adhesive is a proprietary Mactac formulation developed specifically for UV inks. The softness and viscosity of the adhesive allows it to flow into the channels that UV ink creates and provides an impressive lamination with virtually no silvering right off the laminator. Recommended for indoor and outdoor applications and also helps reduce color fade caused by UV light exposure.

Mactac HORIZon XL Laminate

PERMACOLOR HORIZon XL1000 is the thinnest polyurethane wrap overlaminates film in the market today. Unlike cast vinyl films, this is PVC free and more environmentally friendly. PERMACOLOR HORIZon XL1000 is guaranteed to last up to 5-8 years on vertical surfaces and 2-3 years on horizontal surfaces, all while preventing discoloration due to extreme temperatures and acid rain. PERMACOLOR HORIZon is extremely conformable and designed to be used in high performance applications.

Ultraflex G-Floor Wood Grain Clear 35 mil

G-Floor Wood Grain Clear 35mil is a durable vinyl floor graphic material suitable for a wide range of applications such as P.O.P, architectural, automotive and ASI. This product is specifically designed for solvent and UV printers and is best suited for second surface printing. Stand alone or backed with adhesives.

Item No.	Specs	Price	\$/SqFt
CS35WG5425CC	54" x 25'	\$219.38	\$1.95

Ultraflex G-Floor Clear Graphic Media 75 mil

G-Floor Clear Graphic Media 75mil is a durable vinyl floor graphic material that is suitable for a wide range of applications from P.O.P, architectural, automotive to ASI applications. It is specifically designed for digital and screen grand format printers both solvent and UV curable. G-Floor is best suited for second surface print viewing and offers the most durable material layer in the industry. G-Floor is available in Diamond Tread, Levant, Ceramic, Small Coin and Wood Grain textures.

Call for pricing and availability.

Ultraflex G-Floor Wood Grain Absolute White 75 mil

G-Floor Wood Grain Absolute White 75-mil is a solid white product with a Wood Grain texture. This product has excellent print adhesion and allows for short-term and medium-term floor graphics with first surface printing. As the only product in the G-Floor line built for first surface printing, images can be printed directly onto the face of the material. Although, the image could potentially be scratched, it has proven to have a very durable ink bond. Testing of this product has shown that abrasions have to get into the white material in order to effect the ink. A top coat is suggested for additional durability. The product is great stand alone with or without a print.

TEXTILES: BLOCKOUT

APPLICATIONS:

- Many different textiles that enhance graphic prints while still preventing light from showing through or making a print look “washed out”
- Printable with wide and grand format equipment
- Designed for different print technologies: solvent, eco-solvent, UV, latex, dye sublimation transfer and dye sublimation direct.
- From theater backdrops to store environments and P.O.P displays

Ultraflex UltraTex Blockout S335

UltraTex® Blockout S335 is a 9.8 oz textile. The material is composed of 70% polyester and 30% cotton. The product has a polyester finish on one side and a foam finish on the other with a blockout liner in the middle. The unique construction allows for a dual print surface. The fabric may be used for a wide range of indoor applications requiring a blockout effect.

DYE SUBLIMATION PAPER

APPLICATIONS:

- Paper used in the process of dye sublimation transfer printing
- Transfers can be made to a variety of textiles for soft signage or wearables as well as to hard polyester coated materials for ad specialty and promotional items

Beaver Paper ProTex Protection Tissue

Recyclable ProTex™ Tissue provides more widths, more diameters, in stock with over a million pounds in the supply pipeline! With standard widths from 36 cm to 3.2 meters, high density, highly formed natural eucalyptus fiber sheet provides the highest yield and the strongest barrier properties. Reduced mass cuts purchases, reduces storage and disposal costs while formaldehyde-free formulation prevents yellowing of white synthetic fabrics. ProTex™ extends the life of the calendar belt and heat resistant ProTex™ prevents web tear outs. Longer roll length reduces time wasting roll changes.

Call for pricing and availability.

Beaver Paper TexPrint UT

TexPrint® UT Utility Grade Textile Sublimation Paper is designed for water-based inks – The advanced coating chemistry of TexPrint UT provides a unique lightweight print medium engineered for newer high-speed digital sublimation printers and a proprietary coating chemistry with light tack giving confidence during transfers. A superior choice of raw fibers instills a neutral, low-profile cockle that eliminates head strokes. High transfer efficiency, dense blacks and rich colors are achieved with less ink. The coating also provides fine, detailed definition with smooth gradient transitions, high-yielding rolls and less waste for lower cost of handling.

Call for volume pricing.

Beaver Paper TexPrint HS Moda

TexPrint® Moda HS 58 gsm Sublimation Paper is designed for high speed fashion printers and features a proprietary coating chemistry with light tack giving confidence during transfers. A unique lightweight print medium engineered for newer high-speed digital sublimation printers, this paper instills a neutral low profile cockle that eliminates head strikes. Reduce ink consumption with fine detailed definition and smooth gradient transitions. Compatible printers include Mimaki, MS, Reggiani and d.gen.

Call for volume pricing.

DYE SUBLIMATION PAPER

Beaver Paper 92 gsm TexPrint Elite

TexPrint Elite 92 gsm sublimation paper is designed for general-purpose applications. This middleweight paper is suitable for all around everyday use. This paper is textile grade that can be used for both normal and high-speed production. This paper's design give is easy handling with excellent color transfer while reducing cockling. Volume pricing available.

Beaver Paper 140 gsm TexPrint XP-HR PLUS Dye Sublimation Transfer Paper

TexPrintXP-HR Plus® is a 140gsm digital sublimation paper designed around the Mimaki JV5-320 printer. Designed and compatible with the newer high speed inks and piezo print head technology. The high release characteristics of this paper allows for superior color density transfers while reducing ink loads. The heavier paper runs exceptionally well through grand format calendar heat presses with less difficulty than competitive thinner brands of paper. TexPrintXP-HR Plus® is fully compatible with piezo print head technology on all popular large format dye-sub printers, including Epson, Roland, Mimaki and Mutoh.
