ABOUT US

Nazdar SourceOne is the leading supplier of screen and digital printing equipment, inks and supplies. We maintain relationships with the world's foremost manufacturers, providing best-in-class technology and quality to specialty graphic printers in the United States, Mexico and Central America. With a network of 15 locations, we deliver localized inventory, superior customer service and expert technical support to the graphic, textile and industrial markets.

Nazdar SourceOne is dedicated to bringing our customers best-in-class service and quality products. We have partnered with the industry's top manufacturers that are on the forefront of technology. This allows us to confidently offer you innovative solutions that fit your business needs. We are proud to serve you.

SOURCEONE MAKES SHOPPING ONLINE EASY

SourceOne's expanded website, SourceOne.Nazdar.com, offers over 5,000 individual products from the industry's leading manufacturers, at competitive prices.

The website was built with the user in mind and features a large number of improvements including easy search and navigation, product filtering and an optimized layout for mobile devices.

Having a SourceOne online account means you'll never miss out on a great deal or the latest news. You will receive exclusive monthly offers on top rated, brand name products, get new product previews, stay on top of the latest industry news, access free trade show passes and personal product demos. Sign up today!

OUR PARTNERS

EQUIPMENT

Nazdar SourceOne is proud to offer textile screen and digital printing equipment from several of the top brands in the industry. Our equipment solutions include the fastest screen printing press in the industry, digital garment printers – large and small, digital printers for dye sublimation transfer printing, heat presses, pre-treat machines, dryers and much more. Nazdar SourceOne brings you the following top equipment brands:

INK

Nazdar SourceOne works closely with our textile ink supplier partners to bring our customers solutions to fit any ink challenge for any size business. With technologies that cover water-base, plastisol and silicone ink systems that include ready-for-use colors, bases and concentrates, color mixing and matching, and transfers – we provide a variety of solutions for various garment applications. We are proud to offer products from the following suppliers:

SUPPLIES

It is our goal as the leading supplier to provide a full offering of screen supply products to help our customer's business succeed. We offer innovative products for stencil production, adhesives, direct emulsions, capillary films, cleaning and reclaiming products, fabrics, masking films, exposure test positives, as well as stretching, coating and cleaning equipment. With today's high-quality standards, Nazdar SourceOne is proud to offer you screen supplies from the following suppliers:

APPLICATIONS:

- Designed for printing cotton, polyester, viscose and more
- Applications include but not limited to shirts, sweaters, and tote bags

M&R Inks for M-Link X

M-Link inks come in one-liter packages main tank reservoir. To add more ink, all the operator needs to do is unscrew the cap of the main reservoir, pour in the desired ink, and put the cap back on. There is no shaking or chip-resetting involved. This allows for inks to be sold in bulk quantities instead of more expensive ink cartridges.

PLASTISOL

Low Bleed Whites

APPLICATIONS:

- Designed for printing on 50/50 and other cotton blends with moderate bleed resistance
- It is recommended to perform long term testing on fabrics to determine if they are going to bleed. Bleeding or dye migration may not occur immediately and can appear several days after printing
- Can be used as an underbase white or as a top white
- Some low bleed whites are prone to ghosting on 100% cotton fabrics under certain conditions. Test fabrics prior to production.
- Phthalate Free

Wilflex Epic Quick White

Wilflex™ Epic Quick White is a non-phthalate premium white ink that delivers superior printability and visual appearance. Epic Quick White can be used as an underbase flash white or as a highlight white. It is characterized by an extremely fast flash time with low after-tack, excellent fiber mat-down, high brightness and matte appearance. Epic Quick White is designed to perform well on cotton/poly fabrics where moderate bleed-resistance is required.

*Cures at 300°F

Item No.	Size
PFW1183504	Gallon
PFW1183505	5 Gallon

International Coatings 7014 Legacy White

International Coatings™ 7014 Legacy White is a low bleed, high pigment, low fusing, fast flashing, low tack, non-phthalate plastisol screen printing ink. Its creamy viscosity and medium body make it suitable for auto or manual presses. The ink contains no bleaching agents. No bleaching agents equals no or minimal ghosting.

*Cures at 325°F

Item No.	Size
IC7014NP04	Gallon
IC7014NP05	5 Gallon

PLASTISOL

Low Bleed Whites

Wilflex Epic Bright Tiger White

Wilflex™ Epic Bright Tiger White is a non-phthalate, high-performance, low bleed white ink for application on 100% cotton and cotton/polyester blends. Epic Bright Tiger's premium opacity, optical brightness, fiber mat down, low gloss level and good flash properties permit it to be utilized as a first down flash white or as a highlight white. A versatile white ink with commendable performance across a wide range of mesh screens on manual or automatic equipment.

*Cures at 300°F

Item No.	Size
PFW1148004	Gallon
PFW1148005	5 Gallon

Wilflex Epic Amazing Bright White

Wilflex™ Epic Amazing Bright White is a non-phthalate white ink designed for applications on 100% cotton and cotton/polyester blends where moderate bleed resistance is required. This white ink is press stable, giving printers flexibility to operate at a wide range of mesh counts, squeegee pressures and pallet temperatures. Epic Amazing Bright White is a general purpose white ink with reliable press performance producing good quality prints at a great value to any print shop.

*Cures at 300°F

Item No.	Size
PFWK2200ABW04	Gallon
PFWK2200ABW05	5 Gallon

International Coatings 7042 Blaze Low Bleed White

International Coatings™ 7042 Blaze Low Bleed White is a low bleed, high pigment, fast flashing, low tack, non-phthalate plastisol screen printing ink. Blaze Low Bleed White has a creamy viscosity with a medium body. It is formulated to make printing opaque white easy on both hand and auto printing equipment. Hand printing is less tiring because less squeegee pressure is needed. The result is improved operator performance. Automatic equipment can be adjusted to lower pressure settings, thus improving screen life, squeegee durability and overall print quality. Blaze Low Bleed White offers superior results through its brightness, opacity, soft hand and fast production speed.

*Cures at 325°F

Item No.	Size
IC7042LF04	Gallon
IC7042LF05	5 Gallon

Wilflex Epic Single LC White

Wilflex™ Epic Single LC White is a non-phthalate, premium white ink designed to be non-ghosting for universal use on polyester and cotton substrates with bleed resistance properties at low temperature cure requirements. Designed to help printers simplify supply chain, reduce inventory costs and energy consumption.

*Cures at 260° to 280°F

Item No.	Size
PFXK2200SLC04	Gallon
PFXK2200SLC05	5 Gallon

PLASTISOL

Cotton Whites

APPLICATIONS:

- Designed for printing on 100% cotton garments
- Little or no bleed resistance
- Can be used as an underbase white or as a top white
- On some types of cotton fabrics that have been over-dyed, pigment dyed or stone washed, dye migration or bleeding may occur, test fabrics prior to production.
- Phthalate Free

Wilflex Epic Sprint White

Wilflex™ Epic Sprint White is a non-phthalate premium white ink that delivers superior printability and visual appearance. Epic Sprint White can be used as an underbase flash white or as a highlight white. It is characterized by an extremely fast flash time with low after-tack, excellent fiber mat-down, high brightness and matter appearance. Epic Sprint White is designed for applications on 100% cotton fabrics.

*Cures at 300°F

Item No.	Size
PFW1133504	Gallon
PFW1133505	5 Gallon

International Coatings 7038 Blaze Cotton White

International Coatings™ 7038 Blaze Cotton White is a very economically priced high pigment (HP) white plastisol ink for use on 100% cotton fabrics. With its creamy consistency, the ink is very easy to print, requiring less pressure to print the ink through finer screen meshes. 7038 Cotton White is also formulated to resist ghosting and fabric discoloration.

*Cures at 325°F

Item No.	Size
IC7038LF05	5 Gallon

PLASTISOL

Polyester Whites

APPLICATIONS:

- Designed for printing on 100% polyester garments
- Excellent bleed resistance for substrates prone to dye migration
- Lower cure temperatures
- Can be used as an underbase white or as a top white
- Some low bleed whites are prone to ghosting on 100% cotton fabrics under certain conditions. Test fabrics prior to production.
- Phthalate Free

Wilflex Epic PolyWhite LC

Wilflex™ Epic Polywhite LC is the best-in-class low bleed white with highest opacity rating in the Wilflex white's portfolio. Printers easily achieve a full ink deposit and excellent coverage when using EPIC Polywhite LC. Recommend to cure at low temperature (270°F) but gives excellent bleed protection at all cure conditions.

*Cures at 270° to 320°F

Item No.	Size
PFWK2200PLYLC04	Gallon
PFWK2200PLYLC05	5 Gallon

Wilflex Epic Performance LC White

Wilflex™ Epic Performance LC White combines best-in-class bleed resistance with ultra-stretch performance for a premium soft and pliable hand feel. It is designed to print onto a variety of specialty fabrics, including compression wear, stretch garments containing spandex, lycra or elastane, polyester, blends and triblends.

*Cures at 270°F

Item No.	Size
PFWK2200PLC04	Gallon
PFWK2200PLC05	5 Gallon

Wilflex Epic Top Score LC White

Wilflex™ Epic Top Score LC White is a high-performance low bleed white ink aimed for polyester sports apparel and team sports number market. Use in combination with the Top Score pre-mix athletic colors for a solution to printing polyesters substrates that require low cure temperature.

*Cures at 260° to 280°F

Item No.	Size
PFXK2200TSLC04	Gallon
PFXK2200TSLC05	5 Gallon

PLASTISOL

Color Systems

APPLICATIONS:

- Variety of color matching product lines including pigments and base, equalizers and finished systems to best suit every print facility
- Simple and cost-effective way to achieve PANTONE® simulations.
- Supported by accurate and easy to use IMS color matching software

Wilflex Epic Rio

Wilflex™ Epic Rio is the latest non-phthalate color mixing system from Wilflex and it's been designed with the latest pigment technology for optimum color strength. PANTONE® approved, Epic Rio boasts an extended color range of 18 finished ink mixing components. Together, these provide a perfect balance of color accuracy, vibrancy and opacity for peak press performance and color design.

Wilflex Epic Super Opaque

Wilflex™ Epic Super Opaque Plastisol series ink is a non-phthalate, plastisol screen-printing ink for apparel printers. While these inks perform like the Standard Series, they boast greater opacity for exceptional printing on darks and underbases. The inks have been specially formulated by PolyOne to provide textile printers high-productivity wet-on-wet printing with excellent resistance to build-up without having to change any of the standards associated with printing equipment, dryers or print application methods.

International Coatings 7600 Series

The International Coatings™ 7600 Series is a phthalate free finished ink series. The ready-for-use colors have been specially formulated for high-performance during ultra high-speed automatic printing processes. The ink is very creamy and short bodied with low tack and for ease of printing, a greatly improved shear. Product is well suited for high definition and resolution, fine detail and half-tone printing.

PLASTISOL

Specialty Inks

APPLICATIONS:

- A variety of bases and finished inks for creating unique textures and looks
- Special effect looks can range from glitters, shimmers, glow in the dark, puffs and many more
- Can be used as bases alone or combined with pigments or equalizers to create desired colors
- Individual ink characteristics vary, proper testing is necessary to create the desired look

Wilflex Epic Kosmic Glo

Wilflex™ Epic Kosmic Glo inks are specially formulated non-phthalate inks producing high intensity, phosphorescent, glow-in-the-dark effects. Kosmic Glo inks provide high intensity and maintain a long duration. The inks can be used as stand-alone inks, straight out of the container or integrated with other inks to create a super "glow" effect.

Item No.	Size
PFX9995004	Gallon
PFX9995005	5 Gallon

Wilflex Epic Phosphorescent

Wilflex™ Epic Phosphorescent inks are specially formulated non-phthalate inks producing high intensity, phosphorescent, glow-in-the-dark effects. Phosphorescent inks provide high intensity for a short duration. The inks can be used as stand-alone inks, straight out of the container or integrated with other inks to create a super "glow" effect.

WATER-BASE

MagnaColours Pigments

APPLICATIONS:

- Allows the printer to create an image that is not easily detected when felt or more commonly referred to as a "Soft hand"
- Options in this ink chemistry include solutions for cotton, polyester and cotton/poly blends
- Soft Bases, High Solids, Discharge and Special Effect are all available
- Easy to use pigment and base systems or ready-for-use systems
- PVC-Free, phthalate free ink option

MagnaPrint Eco Series Pigments

MagnaPrint® Eco Series Pigments are pigment concentrates for use with all MagnaPrint Bases. Eco Series Pigments offer high concentration, strong build-up, high brilliancy, constant low viscosity, excellent dispersion stability, tight particle size distribution. Available in 12 colors plus 6 fluorescents are utilized to create user defined colors. APEO and Ethylenglycol free formulations. Basic pigments employed meet the EU, German and US requirements for PCB and Dioxin/Furan trace contaminations.

MagnaPrint AquaFlex V2 Range

MagnaPrint® AquaFlex V2 Range is a high solids water-based ink for printing on light or colored backgrounds. It has been designed to give excellent print performance and open time on high mesh screens. MagnaPrint AquaFlex White V2– is a ready-to-print opaque white paste. This can be used as underbase or highlight white, or pigmented to achieve pastel shades. MagnaPrint AquaFlex Neutral V2 is a ready-made clear base for strong, bright shades.

MagnaPrint HB System

MagnaPrint® HB System is a brand new development from MagnaColours. Due to customers experiencing issues with the poor quality of discharge fabrics, MagnaPrint HB has been developed as a type of mock discharge system that produces discharge look prints with a soft hand on non-discharge fabric. Printed on top of either a Discharge or AquaPlasWhite FF underbase (dependent on fabric). MagnaPrint HB system can be printed through high mesh counts – up to 100 (255) mesh for best results, and therefore has a very low ink consumption resulting in soft hand and extremely cost effective prints.

MagnaColours Specialty Inks

MagnaPrint Crackle

The MagnaPrint® Crackle range is a fully aqueous ready-to-use printing paste. The range consists of a Neutral and a White designed to give a print effect with a “cracked-aged” appearance on knitted/stretchy fabrics. MagnaPrint Eco Pigments can be added in order to achieve a desired shade. The White may also be used pure to give a white effect. The MagnaPrint Crackle range should be printed through an open mesh screen. The thicker the ink deposit the better the crack effect achieved. After curing MagnaPrint Crackle printed area should be stretched to achieve the “cracked” effect.

Item No.	Description	Size
MCG5267K5	Neutral	5 Kilo
MCG5203NK5	White	5 Kilo

MagnaPrint Brittle Base

The MagnaPrint® Brittle Bases are fully aqueous ready-to-use printing pastes designed to give a print effect with a “cracked-aged” appearance on knitted/stretchy fabrics. MagnaPrint Eco Pigments can be added in order to achieve a desired shade. The White may also be used pure to give a white effect. The MagnaPrint Brittle Base range should be printed through an open mesh screen. The thicker the ink deposit the better the crack effect achieved.

Item No.	Size
MCTD6518K5	5 Kilo

MagnaPrint Self Crack

MagnaPrint® Self Crack has been developed to re-create the effect of old varnish that cracks over time to produce a “cracked-aged” appearance. MagnaPrint Self Crack consists of the MagnaPrint Self Crack Underbase – ready-made underbase and MagnaPrint Self Crack – ready-made Self Crack Top Coat. MagnaPrint Self Crack Underbase should be printed as a thick layer first and then flash cured until touch dry. MagnaPrint Eco Pigments can be added up to 6% to achieve desired color. MagnaPrint Self Crack should be printed on top of flash cured underbase. MagnaPrint Eco Pigments can be added up to 6% to achieve desired color. For best results it is advisable to apply medium to thick layer of MagnaPrint Self Crack, a medium print application will result in smaller cracks while a thicker coat will create larger cracks.

MagnaPrint Reflective SB

MagnaPrint® Reflective SB is a ready-to-use water-based textile printing ink containing micro glass beads which reflect light. MagnaPrint Eco Pigments can be added to achieve desired effect at a maximum level of 2 to 3%, exceeding these levels may detract from reflectivity.

Item No.	Size
MCG6283K5	5 Kilo

WATER-BASE

MagnaColours Specialty Inks

MagnaPrint Reflective Clear

MagnaPrint® Reflective Clear is a ready-to-use water-based textile printing ink containing micro glass beads which reflect light. MagnaPrint Reflective Clear can be colored with MagnaPrint Eco Pigments and printed directly onto light colored fabric or a underbase such as AquaFlex V2 for dark fabrics. Alternatively it can be used as a final overprint on multi colored designs. PANTONE® color of color printed underneath the Reflective Clear will be affected and not an exact color match.

Item No.	Size
MCTD6501K5	5 Kilo

MagnaPrint Suede Foam

MagnaPrint® Suede Foam is a ready-to-use water-based printing paste to achieve suede/mock flock effect. MagnaPrint Suede Foam has soft hand and good wash and dry cleaning fastness. MagnaPrint Suede Foam can be colored with up to 6% of MagnaPrint Eco Pigments.

Item No.	Size
MCC370EXK5	5 Kilo

MagnaPrint Crystal Clear Reflective

MagnaPrint® Crystal Clear Reflective is a ready-to-use water-based textile printing ink containing micro glass beads which reflect light. MagnaPrint Crystal Clear Reflective can be colored with MagnaPrint Eco Pigments and printed directly onto light colored fabric or an underbase such as AquaFlex for dark fabrics. Alternatively it can be used as a final overprint on multi colored designs. Final product will be very true to the pantone color printed underneath the MagnaPrint Crystal Clear Reflective.

Item No.	Size
MCTD6638K5	5 Kilo

MagnaPrint Underbase Grey

MagnaPrint® Underbase Grey is a bleed blocking PVC and phthalate free water-based ink for use on 100% polyester or other textile fabrics where dye migration is a severe problem. MagnaPrint Underbase Grey is highly effective in preventing fabric dye migration in almost all situations and also helps build good opacity. When overprinted with white or colored inks, MagnaPrint Underbase Grey preserves the brilliance of the whites and colors and maintains the details of the design.

Item No.	Size
MCTD6409K5	5 Kilo

CCI

T-CHARGE

CCI T-CHARGE is a bright, ready-for-use, discharge ink. It can be used straight from the container as a water-base ink or add D-Powder to discharge. The colors can be mixed together to match a wide range of shades according to CCI's Color Matching System. T-CHARGE can be used in conjunction with other ink systems to produce multiple effects. T-CHARGE's rheology and flow characteristics allow it to be printed with high mesh counts. This produces very fine image detail and a softer finish.

CCI

BOOST Pigments

CCI BOOST is a water-based, pigment concentrate, mixing system for brilliant and correct color matches. These vibrant pigments are heavily concentrated, viscous and easy to measure. When combined with our D-Base or W-Base, the results are bright vivid colors with an amazing soft feel. When printing on white 100% cotton fabrics the cost per print is less than that of plastisol. This is a phthalate and APEO free pigment system for 100% cotton fabrics.

WATER-BASE

CCI

CCI D-Base Premium

CCI D-Base Premium is a clear water-base discharge ink. Suitable fabrics are easily discharged producing an extremely soft hand. D-Base can be used as a color-stripping, “bleaching”, underbase or can be used with pigments. D-Base can be used in conjunction with other ink systems to produce multiple effects. D-Base’s rheology and flow characteristics allow it to be printed with high mesh counts. This produces very fine image detail and a softer finish.

Item No.	Size
CCD-BASEPREM04	Gallon
CCD-BASEPREM05	5 Gallon

CCI D-White

CCI D-White is an extremely bright white water-base discharge ink. Suitable fabrics are easily discharged producing an extremely soft hand. D-White can be used as an opaque underbase, highlight white, or can be used with pigments. D-White can be used in conjunction with other ink systems to produce multiple effects. D-White’s rheology and flow characteristics allow it to be printed with high mesh counts. This produces very fine image detail and a softer finish.

Item No.	Size
CCDWHITE04	Gallon
CCDWHITE05	5 Gallon

CCI P-Charge

CCI P-Charge is an ink additive that will make plastisol inks perform like water-based discharge inks. The results are a softer hand and the feel of a water-based print without having to have a separate mixing system. All you need are dischargeable dyed garments and P-Charge to get a new look.

Item No.	Size
CCPCHARGE05	5 Gallon

CCI U-Base

CCI U-BASE is a white underbase discharge ink specifically designed for use in conjunction with plastisol and water-based inks. U-BASE is used as a color-stripping, “bleaching”, underbase. The natural fabric color is replaced with a white underbase. Suitable fabrics are easily discharged producing an extremely soft hand. U-BASE’s rheology and flow characteristics allow it to be printed with high mesh counts, which produces very fine image detail and a softer finish.

Item No.	Size
CCUBASEWHT04	Gallon
CCUBASEWHT05	5 Gallon

CCI Spot Black

CCI Spot Black is an extremely dark black ink for water-base printing. This ink is ready-for-use. Spot Black is a high opacity ink for a strong vivid color. Spot Black has a thicker viscosity than normal water-base inks, but it’s rheology allows it to flow through higher mesh counts. This produces very fine image detail and a softer finish. Spot Black can be printed in long runs without drying in the screen. Spot Black is designed to be used with suitable, non-coated, cotton fabrics and some polyester blends. Test your substrate first to make sure the ink works properly.

Item No.	Size
CCSPOTBLACK04	Gallon
CCSPOTBLACK05	5 Gallon

CCI D-Powder

CCI D-Powder is a discharge activator. Stir in 3 to 6%, by weight and mix well. Different percentages of the Activator will affect the discharge results; increase or decrease in order to achieve desired results. Mix only enough for current production requirements. Activated ink should be used within 8 hours.

Item No.	Size
CCDPOWDER03	Quart
CCDPOWDER04	Gallon

WATER-BASE

CCI

CCI PURE WHITE

CCI PURE WHITE is an extremely bright white ink for waterbase printing. This ink is ready-for-use. PURE WHITE is a high opacity ink with great color reflection for a strong vivid color. It can be printed as a direct white or used as an underbase white. PURE WHITE can also be used with CCI's CMS pigment system. PURE WHITE has a thicker viscosity than normal water-base inks, but it's rheology allows it to flow through higher mesh counts. This produces very fine image detail and a softer finish. PURE WHITE can be printed in long runs without drying in the screen. PURE WHITE is designed to be used with suitable, non-coated, cotton fabrics and some polyester blends. Test your substrate first to make sure the ink works properly.

Item No.	Size
CCWBPUREWHT04	Gallon
CCWBPUREWHT05	5 Gallon

CCI WB-RETARDER

CCI WB-RETARDER is a formaldehyde-free additive designed to extend the screen life of water-based ink during production printing. It is compatible with water-based and discharge ink systems. WB-RETARDER can be used to thin and slow down the air drying process of the ink, which especially comes in handy for printing water-based inks through a high mesh count such as a 230 mesh or higher. It is also very useful on hot days or when there is a lot of air-flow, from fans or ventilation systems, blowing across the screens. Also useful when printing in higher altitudes. Add 3 to 5%, by weight, directly into the water-based ink. Over 5% will slow down and lengthen in curing times or inhibit complete cure.

Item No.	Size
CCWBRETARD03	Quart
CCWBRETARD04	Gallon

CCI W-Base

CCI W-Base is a clear base for water-base printing. W-Base is designed to be used with pigment systems or as an extender for standard water-base colors. W-Base has great color reflection for strong vivid colors when mixed with CCI's CMS Color Mixing System. W-Base can be mixed with other pigments as well. W-Base's rheology and flow characteristics allow it to be printed in long runs without drying in the screen. This ink produces very fine image detail and a softer hand. W-Base is designed to be used with suitable, non-coated, cotton fabrics.

Item No.	Size
CCWBASE05	5 Gallon

NON-PVC

Silicone

APPLICATIONS:

- Allows the printer to create imprints for high-performance sports apparel fabrics
- High elongation and excellent durability on elastic fabrics
- Easy to use pigment and base systems or ready-for-use systems
- PVC-Free, phthalate free, solvents free, no organotins or formaldehyde

ImageStar Silicone 3500

ImageStar Silicone 3500 Series RFU Textile Ink Series is a ready-for-use screen printing ink line developed for printing on performance and smooth polyester fabrics. This PVC-free ink series exhibits superior elasticity and durability when printed on these demanding fabric types. The IMS3500 series consist of 23 standard colors which are catalyzed using the IMS2200 Silicone Catalyst. The IMS3500 series features low curing temperature which greatly reduces the potential for dye migration. The IMS3500 RFU Silicone Ink Colors are manufactured with a retarder addition to maximize the screen open time of the catalyzed product resulting in a very production-friendly printing ink that can run up to 6 hours with minimal screen drying issues.

NON-PVC

Silicone

ImageStar 2102 Mixing Base

2102 Silicone Mixing Base is to be used with IMS1500 Series Pigments or as a stand alone clear. This product features a very high viscosity characteristic and very clear base. Built in retarders to allow for ease of printing as well as excellent flow characteristics, making it ideally suited for clean fluorescent colors and HD inks.

*Requires the use of IMS2200 Silicone Catalyst.

Item No.	Size
IMS210204	Gallon
IMS210205	5 Gallon

ImageStar Masking Black

Silicone Masking Black is a first down ink layer. Flash, then overprint with white and colors as standard print procedures. The Masking Black is designed to block and absorb the sublimated dyes thus inhibiting these dyes from migrating through and into the white and over print colors.

*Requires the use of IMS2200 Silicone Catalyst.

IMS3524504	Gallon
IMS3524505	5 Gallon

ImageStar 3102 Mixing Base

3102 Silicone Base is to be used with IMS1500 Series Pigments or as a stand alone clear. This product is designed to be used on manual or automatic presses. Features include built in retarders to allow for ease of printing as well as excellent flow characteristics.

*Requires the use of IMS 2200 Silicone Catalyst.

Item No.	Size
IMS310204	Gallon
IMS310205	5 Gallon

ImageStar Silicone Clear Gel

Silicone Clear Gel is a 2-part clear textile ink that is applied as a top print in the apparel screen printing process to achieve a super glossy effect. This product is also an excellent carrier for glitter flakes, glow-in-the-dark pigments, reflective beads, thermochromatic and photochromatic pigments.

*No additional catalyst is required, sold in a 2-part kit only.

Item No.	Size
IMS4200PKQ	2-Part Quart
IMS4200PK	2-Part Gallon

NON-PVC

PVC-Free Plastisol

APPLICATIONS:

- Non-PVC solution for textile printing
- Unlike water-base or silicone, this ink won't dry in the screen
- Easy to mix, ready-for-use color matching system
- Flat inks, barrier gray and special effects available
- No catalyst required
- Excellent solution for decorating on hydrophobic fabrics

Wilflex One

Wilflex™ One is the latest innovation for printers and brand owners needing non-PVC plastisol inks that perform to the most rigorous testing and aesthetic requirements in the market today. Wilflex One is ready for any size production run even in the harshest environments. Have the freedom to perform using Wilflex One. It has been formulated without PVC but prints and cures like a traditional plastisol.

NON-PVC

PVC-Free Plastisol

International Coatings Axeon HD

A non-PVC ink option to produce dramatic 3-dimensional, heavy-deposit prints. Because of reduced tack and increased flow characteristics, these high viscosity, non-PVC, plastisol inks will print through thick stencils. Their unique flash time will speed up production and dwell time in the dryer. Extremely sharp edges can be produced for maximum effect.

Item No.	Description	Size
IC184305	Non-PVC HD White	5 Gallon
IC184105	Non-PVC HD Base	5 Gallon

International Coatings Axeon Metallics

Metallics are non-PVC plastisol inks containing microscopic metallic powder for a bright and shiny, chrome-like metallic look when printed. Shimmers and Crystalina are non-PVC plastisol utilizing high-grade shimmer flakes to provide a brilliant metallic shine to any garment décor.

Item No.	Description	Size
IC185505	Non-PVC Crystalina	5 Gallon
IC185604	Non-PVC Silver Shimmer	Gallon
IC185605	Non-PVC Silver Shimmer	5 Gallon
IC185705	Non-PVC Gold Shimmer	5 Gallon
IC189605	Non-PVC Metallic Silver	5 Gallon

NON-PVC

PVC-Free Plastisol

International Coatings Axeon Foil Adhesive

Axeon Foil Adhesive is a non-PVC clear plastisol adhesive used to produce brilliant metallic foil designs on textiles. Foil adhesive can be printed directly onto the fabric. Foil is then applied to the dried adhesive using a heat press.

Item No.	Size
IC180105	5 Gallon

International Coatings Axeon Flock Adhesive

Axeon Flock Adhesive is a non-PVC plastisol strong flock that cures to a soft, elastic, pliable print. Its "short" body allows a thick deposit to be printed easily for flocking.

Item No.	Size
IC182005	5 Gallon

International Coatings Axeon Granite

Axeon Granite is a non-PVC plastisol. Granite Base is a versatile ink that dries to form a granite or vinyl-like substrate that can be used alone or in combination with other products to create various textures and special effects prints.

Item No.	Size
IC181105	5 Gallon

NON-PVC

PVC-Free Plastisol

International Coatings Axeon Glow

Axeon Glow is a non-PVC plastisol, Glow-In-The-Dark (phosphorescent) screen printing ink that produces a bright, greenish-yellow glow in a darkened area after it has been exposed to light.

Item No.	Size
IC180805	5 Gallon
